

TigerMat

High Quality Rubber & EVA Matting

EVA Wall Mats Protect and Line

Our EVA Wall Mats protect both the horse and the wall from injury or damage. The mats come in either a 10mm or 20mm thickness. The 10mm mat can be used for ponies and the 20mm is recommended for horses.

We offer a galvanised metal steel capping to protect the top edge from damage. The mats can be screwed to a masonry or wooden wall using our fixing kits listed below.

Product Code	Thickness	Edge Type	Equine
TM-10WM	10mm	Straight	Wall Lining/Horse Box Lining
TM-20WM	20mm	Straight	Wall Lining/Horse Box Lining
Product Code	Thickness	Description	Equine
