Ring and Octagonal Mats Grass Mats For Gateways & Walkways

The 22mm thick Ring Mat is designed to strengthen and reinforce grass gateways and walkways. The mats should be laid on a level area and joined together using the TM-MC22 Mat Connectors or cable ties. The mats can be pegged to the floor using the TM-PP plastic pegs. The grass will then grow back through to provide a reinforced area.

The 22mm thick Octagonal mat is a slightly heavier duty mat than the Ring Mat and is again designed to strengthen and reinforce grass gateways and walkways. The mats should be laid on a level area and joined together using the TM-MC22 Mat Connectors or cable ties. The mats can be pegged to the floor using the TM-PP plastic pegs.
