

TigerMat

High Quality Rubber & EVA Matting

Silage Mats With Handles

Our Heavy Duty Silage Mats are used to cover and seal silage or maize pits. At 34kg each, they will not blow off or lift in the wind. The weight is evenly spread across the surface, and the rubber mats mould themselves to the shape of the pit, ensuring a tight air seal.

It has been proven using silage mats helps slow down the decomposition of silage or maize, and in turn, this helps reduce the volume of effluent. The design of the mat provides total protection from birds and other wildlife.

Product Code	Thickness	Edge Type	Agriculture
TM - SM12	12mm	Straight	Silage Pit Mats

TigerMat

High Quality Rubber & EVA Matting

TigerMat is a division of Plus Retail Ltd, Unit 3, Beechlea Industrial Estate, Winkleigh, Devon, EX19 8DH.

DATA Sheet

Silage Mats

Product Code	TM- SM12
Thickness	12mm
Variation + / -	3%
Material Type	Solid Rubber
Top Design	Smooth
Bottom Design	Smooth with handles
Grip	Low Grip
Edge Type	Straight
Tensile Strength	3 MPA
Weight (kg)	34 kgs
Size (Metric)	1.8 x 1.2 Mtr
Sq/Mtr per Mat	2.16
No. per pallet	50
