

TigerMat

High Quality Rubber & EVA Matting

EVA Comfort Mat Chequer Plate Design

The EVA Comfort Mat is a foam and rubber composite that offers a softer alternative to solid rubber. The mats come in different sizes that are appropriate for different sized horses or load bearing. The Mats are durable, but due to their lightweight nature will not have as long a life expectancy as solid rubber. We offer straight edge and interlocking variables.

Both designs have discs underneath to allow drainage in multiple directions.
