

Resin Woven Bamboo Tongue & Groove

Our resin woven bamboo t&g boarding is beautiful and incredibly strong. The boards are made from sustainably grown bamboo that is then split into strips, woven together and pressed with resin to form the board profile. The bamboo is coated with a protective top surface to protect from sun degradation. The boards are best used for internal applications. External uses where the boards are in direct weather will likely mean some ongoing maintenance.

Commonly use for internal stables, doors and gates.

Product Code	Colour	Length	Thickness	Board Width (cover)
TB-BA-UV-915	Rich Brown	915mm	32mm	130mm
TB-BA-UV-1200	Rich Brown	1200mm	32mm	130mm
